How to stop shadowban on what? [BRAND NAME REMOVED]? Bumble?

Message support about you wanting to use the app.

Buy a cheap something for [BRAND NAME REMOVED], so you can actually argue about something.

Send them an email saying you really want to use the app as you met cute people on them and would like to subscribe for [BRAND NAME REMOVED] gold etc.

If they see you want to pay and real, they will apologise and remove your ban. Just don't touch your profile after so make sure to do your settings before you contact them, because if you mess around with it it will trigger the system again.
