Thread: [Bypass or getting advantage EVENTIM](#)

xchasm - *February 10, 2023, 3:23 am*

Good day,

On several website i have accounts to obtain tickets for events, they are using ticket-onlineshop.com (EVENTIM).

The queue is a bit problem and is there anyone who can help me bypass this?

Second and most important question, when the queue is over it is the most important to click as fast as possible on the ticket to obtain it, and finally click the checkout box to secure (reserve) the ticket.

Is there anyway to auto (Bot) this handling?

Kindly regards.
