Thread: [It would be better to be able to fly than to be able to turn invisible](#)

Would you rather be able to fly or turn invisible at will and why?

I would rather be able to fly.

I choose flying because being able to fly is just so awesome and it would be so much fun.

What's the point of being invisible? Just to get away with doing things you shouldn't be doing in the first place.

Being able to fly would be crazy, yeah.

Flying would be awesome. You can go anywhere you want, screw being invisible unless you're a 14 year old kid who just hit puberty.

**oRequiem** - February 12, 2023, 7:10 pm

I'd rather fly since it feels like I'm invisible anyways.

It's a tough one for me, but I think I'd rather be invisible.

I would need to know the limitations of each.

Invisibility would be OP, but do I have to be naked to be truly invisible?

How fast can I fly? Do I have to run and take off?

That's a godd question and I am very keen to hear what are those limitations as well before giving out my answer.

Catch me flying, you're right about the invisible thing, like why? wanna rob a bank? do it anyway coward.

**LookingForBusiness** - February 13, 2023, 7:55 am

Flying would be good but this is normal for me most other places

**Smexy** - February 13, 2023, 8:43 am

Flying too fast would kill you, a single bug would smash a hole in your face.

If I had the ability to be invisible I'd probably be tempted to commit so many sins.

So I'd say flying.

Thats what I was thinking. Everyone talking about the usual "peeping" and "robbing a bank" shit but like cmon, that really all y'all can come up with? You can basically fly anyway for free by going invis at the airport and just hopping on any plane you've ever wanted.

Flying has it's benefits, I have high ceilings and no ladder so I wouldn't be stressing when some of these lightbulbs die on me. But ultimately, think of everything you could do invisible. Sneak into anywhere, catch free shows, hang around celebrities, infinite possibilities.

You do realize that people in motorcycles are doing 100mph+, it's called a helmet.

Fair enough, that would make flying a fair choice.

But I think I would still roll with the invisibility thing

Flying without hitting something will still kill you. imagine flying fast as an plane. You'd be frozen to death lol
