Thread: [WW3 Predictions](#)

CrypticHatter - February 12, 2023, 2:24 pm

Yo waddup guys,

Alright so we got more of a complex question here today,

So if WW3 does happen which i may or may not be doubting ;) what do you think will or could happen prediction wise...

I think extraterrestrial life will be involved but they will only appear when things on earth are really out of hand then they will see all the catastrophic events and they will open a black hole which will suck up every bit of man kind left therefore leaving the planet clean of all human life.

But hey that is just a theory ;)

Now tell me yours ?

Smexy - February 12, 2023, 2:26 pm

The Netherlands would communicate with North Korea and Japan and bomb all other countries except UK.

Tando - February 12, 2023, 2:27 pm

Don't worry, Biden will save us all. He's very tough on U.S. adversaries.

What about ww3 already unfolding. I understand the concept but they are testing sirens in almost ever state.

If World War 3 arrives, it's going to nothing but nuclear between the countries. There won't be anything we can do about it.

Sad to hear but its the truth that might be exactly what will happen

I can't see it happening any other way honestly.

Do you think WW3 will happen in our life time ?

I definitely think it's going to happen soon honestly with how everything is going.

"I know not with what weapons World War III will be fought, but World War IV will be fought with sticks and stones".

- Albert Einstein

Nukes definitely comes to mind, nobody's going down without a fight. Sad that it only takes so many nukes to destroy the ozone and fuck the entire planet.

But also for the last couple decades we've had complete air superiority, we owned the sky completely. We shot down anything that flew and we had almost no issues flying out wounded Soldiers. In the war to come, we won't have that shit at all.

Medics are going to be sitting on casualties and will have to learn Prolonged Field Care to keep their Soldiers alive until somehow the sky clears up for a bird, or ground Evac rolls up to take them.

I'm sure there's a ton more things I can come up with, but for my old job that's the down and dirty of how it would end up.

I hope not either. Stay safe as well!

Nukes will decrease population to 500 millions and then the war will stop.

That would be the reality but how I pray and wish it won't happen. Keep safe everyone.

Vitani's Mate - February 12, 2023, 11:36 pm

Call me fucked up but I really fucking hope it happens and everyone just explodes and just fucks off..

This planet could do with a whole reset, the earth will be more than capable to survive without any humans.

The human race has just fucked this planet so much. It pains me that we will just move to another planet after we fucked this planet so much and fuck that planet so much that it will be time to move once again and fuck the next planet and the next for our own selfish needs...

pms - February 13, 2023, 7:58 am

I believe WW3 would be the end of the world.

diablospartan - February 13, 2023, 8:44 am

Well i hope the ww3 will not start and i think all this masquerade its organized by the elite who rules the world and i think if it start then it will be a disaster for the planet and very less people will survive

Charlie Sheen - February 13, 2023, 12:35 pm

I don't think we would be under attack here, but I know companies are drooling at the thought of jacking up prices and being able to blame the war.

EarlNightingale - February 16, 2023, 7:03 am

WW3 started long time ago. But it is not a standard war.

Francis Gallagher - February 16, 2023, 3:49 pm

Personally I believe it already started. Technologically speaking, there's been a war being fought for a while.

The nukes, missiles and stuff you hear on TV is just a show. They can't destroy the planet without destroying themselves. And trust me when I say the elite are all about self preservation.

NATO will quite easily defend USSR and then we're more or less back to normal.

I can't really come up if Ukraine want to go opposite and take land from Russia if the possibility comes.

tripac - February 17, 2023, 3:21 am

Why when we talk about WW3 everyone is mentioning nuclear weapons and how it will end us all. Nuclear weapons won't be used in case of the WW3. Nuclear weapons were always there to pose a threat, to keep a balance of power and to believe it or not avoid future wars.

Just imagine the world without nuclear weapons, without them we would have X amount of super violent wars. Are nuclear weapons bad? Yes. Do we need them? Fuck yes.

The Chinese guys are crazy but I think everyone knows when WW3 is starting the world stops to rotate. When someone fired up a A-Bomb there comes 10 pieces back
