Thread: [Is Bonk the next SHIB?](#)

AltAccountObviously - February 12, 2023, 2:49 pm

I currently hold 8.5bil bonk, what are your thoughts? Doesn't seem like a rugpull or scam to me to be honest

shreder - February 12, 2023, 3:02 pm

I hold 10 nonillion BONK on ETH.

AltAccountObviously - February 12, 2023, 3:13 pm

(Feb 12, 2023 04:02 PM)shreder Wrote: [\[CITE\]](#) I hold 10 nonillion BONK on ETH.

It's on Solana actually. Even Coinbase CEO mentioned it, I doubt he'd mention some completely random shitcoin. You guys should look into it, only 30mil mcap, might be an opportunity. But yeah I guess it's still risky, I just see it as the best bet right now to make crazy amounts and I mean CRAZY in bullrun. I'll keep DCAing into it \$300 per week or so

I also forgot to mention, publicly registered company in January running it. If you look hard enough, you'll be able to find the guy behind it(hint: whitepaper and google lol)

One more thing. It's at the bottom atm or close to bottom, I guess true bottom would be 5000-6000 or so. Rn it's at 8727 as I type this.

What else, it's super early obviously, made in January, Phase 2 reveal will be out but nobody knows it's true goals yet.

It'll either end up like dogecoin, which purpose is just exist and it's up to community to develop, so Bonk might end up like that or team itself starts delivering utilities like Shib had which IMO is more bullish although they gave funds to people who contribute utilities to it so we'll see. Either those 2 options or it's a scam. It's risky but possible crazy returns, it can unironically do 100x in a short time which is very believable if token turns out to be legit and not a scam, I doubt it's a scam, that's why I'm telling u guys about it. Plus it had very crazy gains in February so obviously huge boys behind it too with millions out there. Its no joke when I say this could be Shib number 2. Plus if SOL itself won't disappear, that'll add to the bullishness since its basically a dogecoin, shib of Solana.

One more thing. Bonk meme itself is popular and there's this crypto out there taking it all for itself. Bonk is part of the doge circle meme. Just the word bonk alone should be enough to make it stand out. There's also a possibility, although small but it can maybe just maybe overtake shib, yeah Ik sounds like nonsense right now but anything's possible especially if Shib's shibatarium blockchain turns out to be bad and project itself fails. Yeah this

sounds like schizophrenia right now, but it can go to top #20. I guess we'll see what they'll deliver as that's the only thing that matters right now.

Currently its at 140k holders, #605 in CG and #2626 in CMC with \$5mil volume(was \$180mil at the top). Good luck whoever decides to go for it. Like I said we're at the bottom or close to bottom. ATH is like 5x from here, sooner or later(if not a scam) it should turn into uptrend and go over ATH like other coins and tokens did that had huge pump at the start and later MUCH bigger pump.

PR1V473 - February 12, 2023, 3:47 pm

Why do I get the feeling that something is connecting you to this obvious sh1tcoin?

SUI-3183372 - February 12, 2023, 3:51 pm

From what I was reading, the distribution wasn't as fair and decentralized as they'd like you to think it was.

AltAccountObviously - February 12, 2023, 3:54 pm

Lol, not at all. The only thing that connects me is that I'm actually invested into it. If I was part of the team or something, why would few bucks from here matter for me. I'd rather buy some actual marketing

Here it is bonkcoin.com/bonk-paper

Seems alright to me

I'll try to find the tweet thread later. It went into detail how a very small amount of people wound up with a very large amount of Bonk. I don't recall the specifics because I'm not on Solana myself, but it wasn't the end of the world, it just seemed like it made some of Bonk's statements seem misleading.

AltAccountObviously - February 12, 2023, 5:00 pm

Please do, would be much appreciated ?

trashy - February 13, 2023, 12:08 am

ofc we are looking for gems to 10x or more on the next bull market, but I'd say that's an obvious shitcoin and you can be rugpulled.

Also memecoins were trendy last bull, same as nft games, we don't really know if they are coming back or well see another trend. It could be AI's related cryptos. Dont think memecoins will have the same volume bro

I mean babydoge is currently trending and did 4x along with few others. Bonk itself was very hyped up when 2023 hit lol so memecoins are still trendy. In fact probably going to moon first before altcoins with use cases just looking at the action in January

Bonk is aprox. 5% down since your thread. Not trendy just people wanting to gamble into memecoins. And your vision of "mooning " is different, because it is easy for a small mcap coin to 2x or 4x but that doesn't mean every small mcap pumps.

I wish you get a 10x and sell tho, but as you asked, no, there won't be anything such as a "New SHIB". Maybe BONK is 100x from what shib had or more, you'll need to be a visionary my friend

SIM-5049184 - February 13, 2023, 5:46 am

Another insidior p&d coin that was just hyped to the community. The pfp went to 1 sol, maybe it's a play in the bull run if it doesn't rug but bonk is dead in the water atm

AltAccountObviously - February 13, 2023, 9:49 am

Fuck. Fuck. Fuck. Fuck.

i dont understand how retailoorz still buy into the fact that:

- 1) boogles give any sort of fuck about the ecosystem
- 2) the top echelon of traders are actively going to dump on you every time - further on this ive seen enigma do it, ive seen boogles do it, ive seen every single dao that gets presale alloc and airdrop alloc actively pump these collections or coins and then dump them, you can go on twitter and see sbb specifically say that he didnt have insider knowledge into a token so didn't buy it
- 3) you are the exit liquidity, if you aren't, then you're providing pump liquidity

this cycle that snuffs out retail traders in favor of whales has been going on for the longest time, bonk is cool big deal but it isnt worth holding an ungodly amount of unless you think it will solidify and be worth something in a bull assuming it makes it that long

i sold my airdrop allocation for 1k and didnt look back, im not saying you should sell because i have no stake in the coin and i dont keep up with it, so i dont know enough to tell you but solana is not a friendly space top down

even myself i will dump as many allocations as ive been provided if the profit is good, i dont hold shit that is newer than 6 months old

you should see how these guys talk in twitter chats they do not give a single fuck about anyone but themselves its insane

you will continue to be exit liquid in solana until you have the option to buy presales, that is now the way

Cooldudex - February 13, 2023, 4:25 pm

In terms of giga shitcoins like this.. if you aren't in first, you're last. Enjoy!

Smexy - February 13, 2023, 4:27 pm

I don't know this coin but it has a funny name so that's like 10% interesting to me personally.
