New found respect to anyone that is good at editing, this sucks and it still took me forever.
I may be a little biased on the section I highlighted.
Healthcare for the win!

Enjoy.

Kudos brother, that section doesn't get enough respect. A lot of great information over there. As [Nostre](#) said, you see the name HackForums and you think it's all computers and code, but HF has so much more to offer.

Great video Quentin Tarantino. Your health threads don't get enough love, but just know that I read them. ?
