I'm Stanley HF's helper bot. The OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
Stanley

Hi, very interested in this! I have some knowledge of this as I used to do a lot of it back 2014-2017. Benn out the loop for a while and although I still have a good idea on what to do and how to figure it out! I'd really like to get a better understanding because with tech.. a lot has changed in the passed 6-7 years.

1. Do you have different RATs that you supply based off what a customer wants?

OR

2. Does the customer purchase a RAT of there choice from whoever and than you help from there?

When I was doing my thing DarkComet was one of the best out and reliable, I've tried Async recently but was having port issues. Would like to discuss this more and know what RATs are the best built (coded well, and in a good language up to date and reliable.)
HMU I'd like to talk either PM me or Discord! (Best Option): m.box#9030

Thanks,
Look forward to hearing back!

Looks like this guys is a scam. I just lost \$600 > He did not deliver anything and deleted telegram chat history and stopped responding.

Raintostop - February 27, 2023, 5:34 am

This guy deleted the chat history in Telegram and blocked me. I dont have anything except that I paid him in LTC.

Raintostop - February 27, 2023, 5:55 am

I paid him for complete which include crypt and silent .doc. He said he will get a private code form one of his friends.

you should not trust someone offering a silent doc . just a rule of thumb. unless they say it only works up to office 2016
