Thread: [What are your Gems / plays for the next bull run.](#)

Velma - February 14, 2023, 2:11 pm

As everyone clearly has been accumulating crypto assets during this bear market as everyone should.

My question to you is do you have any hidden gems you are holding or any coins that you personally believe giving good returns.

I will start with one of my plays.

Very much a Degen play

\$RLB Rollbits (crypto casino for people who are not aware) token.

Relatively new token, site is growing very well and they also allow 1,000x futures.
As you can probably tell I am banking on the Degen's on this move.

I have many more plays more serious at least fire question away.

Dorrance - February 14, 2023, 2:18 pm

Should of caught the \$Blur airdrop I was shilling last year would be up \$xxx-xxx,xxx. For free playing with 1E.

There will be alot of tokens being released.

I'm long RLB with you, but will probably TP around \$0.06-\$0.08.

I am wildly bullish on RLB like 50x bullish, long term hold too. But I will humble myself, today was a good test the 14% dump got slurped up like it was nothing only 670 wallets involved today too and I am sure many people have more than one wallet moving funds around.

Today's stats on RLB

TXNS
2,673
VOLUME
\$3.2M
MAKERS
670

I see you are into your staking, what are your thoughts on the recent ban of staking. Miners >>>>> staking IMO.

Omniscient - February 14, 2023, 5:12 pm

The very un-sexy Litecoin. Everyone wants that 100x moon when a 5x is more realistic and easier to obtain.

RLB looks like a top, just the perfect time for people to lose some money

Me personally, it'll be the same as it's been the last 12 or so years, Bitcoin or bust

But some sh*tcoins I got toilet paper money on:

LBC
FSN/CHNG
HNT

Another gamble is Grayscale Bitcoin stock, 50% under its NAV so might work out

I take my own calls I'm chilling how do you think I go from working to being a full time student. And
has still maintained my lifestyle I had before quitting my job.

Tando - February 15, 2023, 1:18 am

\$TRIAS and \$MNW

Solid charts, been getting good gains. Although my DCA game has been kind of weak with them,
they got me over 50% already - wish I put way way more but I'll get more on the dumps.

I don't if my messengers be getting sharing my useful info.

But I gave a 2x play on a NFT (Need to check with the messenger if he got it in or not)

Told Scrub about Link but he be sleep, so you ain't making money if the pigeon cant send a message.

Talking about SOL, I don't know why people dumped the coin sam was just a believer in the coin not the owner, I also believe that SOL is going to produce some great returns.

trashy - February 15, 2023, 6:25 am

I've got on my to-do list to research about Kaspia, I've heard alot of it since I first read of it here-

But currently most of my balance is BTC. Some LTC and XMR too. Looking for a possible gem to throw \$100 or \$200 which could be like gambling haha

LBC have lost their lawsuit with the SEC and have been deemed a security. Trade volume is down to less than \$20k daily. They fought a good fight but they lost.

HNT is a ponzi which nuked rewards for anyone dumb enough to buy their hardware.

Grayscale is down so much because they're insolvent, Barry Silbert owes a lot of people money

and hes not paying up.

They didn't want to be that belieber's exit liquidity when it was clear he needed to liquidate. A very substantial amount was linked to him.

That HNT one hurt but at least I walked a way with a very good amount of profit before they decided to nuke it.

Those belieber's gonna fomo back at ATH smh.

What ban?

You mean SEC going after kraken for offering "staking BTC" when they obviously can't do that and the fact that they were actually loaning out the BTC calling it "staking"?

Even if they outlawed Proof-Of-Srake I'm still staking, there is no possibility of any government or central authority halting my decentralized staking operations.

And since you say Mining>Staking, do you even mine?

No I am degenerate trader and how do you feel that like 50% of ETH nodes is being hosted in USA?

I have a very diversified portfolio. (\$BTC, \$ETH, \$ADA, \$DOT, \$MATIC and etc). \$KDA (Kadena) and \$FLUX are my newest low-cap projects that I think gonna have a great bull market.

This is going to boil down to banning 'staking-as-a-service' or the fake/shammy "earn" programs that centralized entities offer.

We aren't going to see the government banning you from collecting your ETH or Radix or Cardano stake rewards.

We are going to see the government ban you from being able to give the Winklevoss Twins custody of your currency to earn a mysterious yield from who-knows-where.

PoS chains aren't disappearing.

If you are a trader then you have no input.

But I don't feel much considering majority of the hashrate and nodes for BTC also reside and have been increasing rapidly in the USA.

There are trying to become a hub here, but regulations are looking to ban BTC mining. Idk if you seen many states filing laws that would incentivize BTC Mining even power consumption.
