Thread: [You won't call this a newly launched coin a shitcoin](#)

AltAccountObviously - February 15, 2023, 3:56 pm

Core DAO. Is this is the best blockchain there is?

Floor price is about \$2-\$3. Currently at \$3.50 or so

It was listed at \$1, was impossible to buy as you can imagine with bots and all that, quickly went to \$30 within minutes I believe and finally it corrected itself and true entry price revealed itself.

Probably best time to get in.

What I've observed so far is enormous shilling, 1.5mil followers on twitter before it launched and first time I saw it. If you don't know about it, sooner or later you would've as I've said it has ENORMOUS amount of shilling, devs are freakin rich. They had an airdrop where you could mine through their satoshi app, sadly I was too late but, something like 25% was airdropped straight away and now 75% of supply will be unlocked every month of 3% each. You can imagine the amount of Indians, Africans and Chinese shilling it, look at the discord group, it's full of them. All of them will have their stuff unlocked monthly so you can imagine the amount of promo including enormous dev funds.

Best part is obviously the blockchain itself, what I've typed above just adds a huge plus to the price itself.

I probably can't link it as I have too little of a post count, just google up "Core DAO whitepaper", they also have their github out there.

I know you guys are tech savvy so I'm really wondering what you guys think about the blockchain itself. Is it literally the best there is right now? None of those L2s or anything but L1 with every single need there is, smart contracts, it's POW, decentralised. I really wish to hear your thoughts, if tech itself is really that amazing, add to that enormous dev funds for promotions and amount of people shilling it, it's absolutely insane.

This is clearly Broken's alt account in which he can explore shitcoins without being embarrassed.

I can't imagine what planet you are living on that this could be considered positive

Spent all that time shilling BTC obviously needs a new account so we won't shit on him.

Why would that be negative? It just encourages 1mil addresses who got airdropped to promote the coin.

Blur just did an airdrop, mooned hard

Remember uniswap? Exactly.

Name me at least 1 LEGITIMATE project that had negative impact from airdrops.

Also let me clarify, 25% of the total supply will be airdropped. 25% of that airdrop was unlocked instantly, 75% will be vested over two years.

I hope you guys didn't fade and won't fade...

Sike, fk core. Get kspa
