any good minecraft griefing client

Schlxi - July 8, 2023, 10:24 am

I have the Eazy client its the best one that i have . its goes to 1.14 i think but its better if you use a tool thats called ViaProxy

I have Griefed with this client many servers and its like very funny pm me if you are Interested

tbh i find that clients doesn't matter if you're going with the common uuid spoofing, simply use proxyjessica to bypass port forwarding, and in the case you want to pull user's IPS maybe use Jessica client if there's no plugin with Directory Traversal Exploit or database dumping exploits, feel free to hit my dms, i may be of help
