Thread: [Learn Penetration Testing and Hacking with 50 Hours of Voice Chat and Shared Screen](#)

Mr. Robot - February 25, 2023, 12:27 pm

Are you interested in learning the latest techniques in penetration testing and hacking? Do you want to enhance your skills and knowledge in the field of cybersecurity? Look no further! I'm offering a unique service where you can learn various types of attacks, vulnerabilities, and mitigation techniques in a personalized one-on-one setting.

For just \$1,000, you'll get 50 hours of voice chat and shared screen sessions where we'll cover the following topics:

If you can find another person to partner with, I will do 2 people for \$1500.

Beginner friendly, from never having booted a virtual machine. Just having basic windows knowledge is enough.

- Insecure Direct Object Reference (IDOR)
- Cross-Site Scripting (XSS)
- SQL Injection (SQLi)
- Local File Inclusion (LFI)
- Remote File Inclusion (RFI)
- Directory Traversal
- XML External Entity (XXE) Injection
- Server-Side Template Injection (SSTI)
- Server-Side Request Forgery (SSRF)
- Cross-Site Request Forgery (CSRF)
- Business Logic Flaws
- Clickjacking
- Broken Authentication and Session Management
- OAuth and OpenID Connect vulnerabilities
- GraphQL vulnerabilities
- API Security Testing
- Docker Container Escapes
- Mobile Application Penetration Testing
- Social Engineering Attacks
- Phishing and Spear Phishing
- Malware Analysis and Reverse Engineering
- Serverless Security
- Cloud Security
- IoT Security
- Network Penetration Testing
- Wireless Penetration Testing
- Bluetooth Low Energy (BLE) Hacking
- Windows/Linux/Unix Privilege Escalation
- Cryptography and Cryptanalysis
- Advanced Exploitation Techniques
- Web Application Firewall (WAF) Bypass
- SSL/TLS Security and Vulnerabilities
- Buffer Overflows and Memory Corruption
- Red Team Operations

Adversarial Machine Learning

And any other types of attacks you're interested in

We'll also cover the latest tools and technologies used in penetration testing and hacking, including Kali Linux, Burp Suite, Metasploit, Nmap, and more. You'll learn how to identify and exploit vulnerabilities in web applications, networks, and systems, as well as how to mitigate and prevent these attacks.

I have years of experience in the field of cybersecurity and have worked with various organizations to secure their systems and networks. With my expertise and personalized coaching, you'll be able to enhance your skills and become a more valuable asset to your organization or future employers.

So, if you're ready to take your cybersecurity skills to the next level, don't hesitate to sign up for this unique service. Contact me to schedule your sessions and start learning today!

If I could do it for cheaper, that'd be a great world to live in but \$20 an hour is already extremely low :D

70k - March 2, 2023, 2:42 am

Definitely interested in this service. Will get in touch in due course

I-GANK-I - March 2, 2023, 4:57 pm

Not a bad price if you get hands on training with this face2face.

But i think you better sell this as a course instead of a book as that would justify the price better.

Seems like a great service.

Maybe I should clarify a bit more for the non native English speakers.

This is a 1 on 1 course with video and voice communication.

ProfitableFlip - March 31, 2023, 2:10 pm

Posting to come back soon :) interesting.

Lukasi - April 16, 2023, 6:40 am

Bitcoin should be able to withdraw money to my wallet tomorrow. I will transfer it to you tomorrow and officially start my studies. Thank you for providing me with this learning opportunity, and I will definitely work hard
