Thread: [Make an extra 1,200 A month on facebook \(NO EFFORT\) ** Proof Added **](#)

When I say no effort I mean as minimal effort as possible and as close to passive as it'll get. I want to mention you will be required to have a US Phone not sure if VPN would work it might if you have a US Sims card along side it.

I'm honestly not sure how much to sell this for so if you're interested let me know set up will take a min a month and can take even longer but once you got it it's easy money took me 2 months.

This will be more of a 1:1 style thing I do not have anything written due to all the potential variables.

Additionally,

You do not need to post your own content
this is utilizing the reels bonus program
this also bypasses copyright so you don't get demonetized
I've yet to see anyone else do this

edit:

Also for some social proof: I have a network of about 8mil followers across all platforms.

edit again:

gonna post some proof of deposits give me second

Could you hit my DM's with more information?

Comzey - March 1, 2023, 6:07 pm

How much? Might be interested.

Looks like a good method and by the sounds of that 8mil across socials, you'll be absolutely raking in the cash if it's anything like normal earnings for good engagement. The reels bonus program being USA only atm which sucks haha, if you want anyone to try help ya test if the USA proxy w/ online PV would work then I'm happy to work with you on it. I've got around 7 years experience with social media marketing - Not grown too many larger networks; however, have managed accounts that I've sold when they hit like 50k followers haha.

Yeah we might be able to run some test to see if it'll work if you wanna give it a shot would be good data to get honestly. And yeah this is like my lowest earner right now tiktok brings me in like 100k+ so I'm in no way in a rush to sell anything but I like teaching so haha

shoot me a DM man we might be able to figure something out.
