Thread: [A MAILER THAT SENDS MY TEMPLATES TO INBOX NOT SPAM](#)

Pressa Armani - February 27, 2023, 4:18 pm

Hello everyone, hoping that someone would be able to assist me in getting my Emails to reach Inbox and not spam folders on Hotmail, Gmail, Yahoo Etc... would like to send at least 2000 at a time happy to pay for programs, time... etc ? Pm me for more information and i can show you what i need to reach inbox

bump, still searching.... will pay good \$\$

theDuke - February 28, 2023, 10:23 pm

I possibly already have a script built for this. Are you sending from one email and it keeps going to spam? DM me more info and I'll check it out tomorrow.

I've written a response to your request here

<https://hackforums.net/showthread.php?tid=6233287&pid=61892377#pid61892377>

For 2000 email blast you will need 6 - 7 SMTP servers on rotation in a 24 hour period. Or Webshells which allow spoofing.

Let me know if I can help with anything else.

i do need more assistance sir

MAILER WORKING - Quote:<https://prnt.sc/yAdmyX2D2kJ4>

I have mailer private , only need good smtp corporate brute or crack this work fine, also recommended good letter and txt encrypt.

Mailer code can be used in your letter multiple link 100-200-500-1k of links different, mailer code change in each sending 1 link different for each letter your sending , smtp random sending, subject random, sender random, link random, timer random, check spamassassin.

simple interface and execution in cmd with Node.js

xDrHax - May 31, 2024, 12:38 pm

pm me if still interested

frankayama101 - June 17, 2024, 5:19 pm

am interested ,.....i need inbox level
