Thread: [\[LOOKING\] Crypto Casino Developer \(frontend/backend\)](#)

darkcode - March 3, 2023, 5:37 pm

Hello,

I am looking to build out a Crypto Casino, I have the layout roughly sketched out and the functionality all down. Just looking to make a MVP as of now and continue with the site if everything works out. Looking for a team or partner to stay along throughout this project. Will be paid upfront and rest can be negotiated. Please dm me if interested, also attach any experience you have and a way to contact you (discord/tele). (Case opening games).

Angela White - March 3, 2023, 7:19 pm

PM me with a rough idea of what you want and your budget please

(Mar 3, 2023 08:26 PM)Yung Zel Wrote: [\[CITE\]](#) I have a really good recommendation, I won't share his Telegram @ publicly but if you want someone who built me a casino quite affordable & is trustworthy, let me know.

Hey I sent you a Pm. Thank you for your recommendation.

Hi there, you've probably already found someone and I'm probably not what you're looking for, but here I am anyway XD

I have a ton of experience coding with bitcoin. I have zero experience in web development so I won't be able to help there, but I could build an API.

java, c++, sql, linux
