Thread: [Is BYOB decent?](#)

SIM-4945213 - March 4, 2023, 6:11 pm

Hey all. I've been working with c++ for a couple years but I'm a bit overwhelmed with all the stuff necessary to make botnet software. I've been looking at github.com/malwaredlc/byob/tree/master/byob - has anyone used this before? Any other suggestions for prebuilt stuff? I'm just looking for a small mining botnet.

Thanks all!

Its outdated and made in python, i recommend taking the time to understand and learn and write one from scratch in c++

Alright, thanks.

What are your thoughts on prebuilt solutions such as zelos1337.mysellix.io/product/625ef236a7e4e?

I'm mostly just looking for mining bots so this would suit my needs (with debian, not windows server lol).

Thanks for your time btw.
