user ubersuggest, seo minion and keyword everywhere, search for words that are used, make blogs with chatgpt, publish your posts in places that will bring new views, use autosurf (not very recommended)

getting a ranking takes a few days, you need to make an effort to have a good ranking!

Placing ads and ranking website are 2 different things. I am looking to hire a person who can rank my website via BH methods quickly since actual SEO can take months and sometime even a year
