So first off, I know eBooks have a horrible reputation here on Hack Forums, but I promise you this will probably be the first and last legitimate eBook for money-making on this forum. This isn't a shitty eWhoring, CPA, surveys, or any of that other crap you'll see on here. This is a legitimate guide on how to start a real business that takes minimal effort to run and returns a good chunk of passive, monthly income. Everything is 100% white hat and legal and is 100% capable of being a source of passive income / stable work for anyone. Only requirements are that you have a computer and you aren't actually braindead.

This method is what I have genuinely been doing since 2019 and I was able to quit my job in 2020 and live off of the income I make from this method. This isn't something that's easily saturated, so I don't mind giving this information out to help others. Only reason I'm charging for this is because I am actually going to offer support for all buyers and make sure everyone succeeds with the method. I'll answer all messages and even help with the setup process.

This method requires approximately \$20 to set up and is 95% autopilot / free money once you get it going.

I am selling this method for \$40 for the Basic Package, which includes the eBook and Discord support. I am also going to be offering a \$150 package where I will set everything up for you and get everything ready for you to start making money. This includes a 1 on 1 Discord call.

All purchases get life-time updates for the eBook and lifetime support.

FAQ

Q: How long does it take to start seeing results?

A: Since this is starting up your own business, your results come from how much you put into this. You obviously won't make a ton of money overnight right away, but it's almost impossible to not profit off of this. But obviously with anything, the more you put into it, the more you get out of it. If you just set everything up and never touch it again, you're obviously not going to make much.

Q: Does this involve reselling, selling Netflix, Spotify accounts, etc.?

A: No.

Q: Is this something that you can list on your resume?

A: Yes and it will make your resume look great especially for anything business related.

It kind of involves sales? You're offering a service to people that takes little to no effort to do. Once you set up the service for the customer you usually never have to contact them again, and if you have to, they'll pay you more.

Yep! It wouldn't be right away obviously it'll take time but this an easier version of what I've been doing for years. My first year of doing it I made \$40,000. I started this at the beginning of COVID due to me just moving across the country and not being able to find a job because everything was closed down.

100% works in the EU, as long as you're near a community of people & businesses.

what exactly you mean with "being near" ?

Since it involves performing a service for businesses, you can do it remotely from anywhere, but it just makes it easier if you don't live in some complete remote area because it gives you a whole extra avenue of profit. It's not required but it's what's made me a good chunk of money so I feel it's important to note.

Nope, nothing related to that. This is how to set up a genuine business to grow yourself.

I am intrigued and will probably message you tomorrow when I get off work about this. Are you still selling \$150 packages or were you only doing one? That's probably the one I'm interested in.

I'm doing an unlimited amount of those; the price will increase as more people buy it as I'm personally helping everyone with it but the price shouldn't change for another week or so. You should be fine :)

Add me on Discord if you want and I can give you some more info Kaspr#4385

Angela White - March 22, 2023, 2:15 pm

I got 5 people set up with the \$150 package. Only going to do probably another 5 at that price before it's raised to \$225.

Angela White - March 26, 2023, 3:54 pm

I've only sold like 4 copies of this, I'm not out here mass-marketing it because I don't care that much on how many purchases it gets. Pretty much everyone who's purchased this doesn't even use HF and disappeared from the forum a few days after purchasing.
