Thread: [Best platform to sell digital products?](#)

stolickovystol - March 9, 2023, 2:31 pm

Hi there!

I want to sell my digital products (ebooks,etc.) and i am wondering what platform would be best. Can you recommend some websites which i should look up to? I would preform something like your own shop rather than craglists. Thanks a lot!

you can create your landing page and make your platform for sell this :)
using stripe or paypal with payment

User could also try Gumroad. I've heard positive reviews about them.

Sell.app is pretty good, shoppy & sellix not too bad either.

I'm interested in the affiliate method.
