Thread: [Torrent to Cloud service cheap!!!! Mega.nz](#)

?{ RadioActive Hack }? - March 11, 2023, 3:09 pm

I am honestly not sure if this is something anyone would even be interested in. Probably not, but I guess we will find out.

This is what I am offering.

If you have torrent files that you wish to move to a cloud service. I can facilitate that for you.

You provide me with the .torrent files or magnetic links to me, then I will download them into my Mega.nz account and give you the link to allow you to import the torrented files to your own account. Butta bing butta boom, that simple.

The torrent's download speed is pretty quick, the biggest factor is the quality of the torrent link.

If you require your torrents to go into another cloud service. E.g google cloud, Dropbox, Microsoft OneDrive etc...

I can probably facilitate that, so message me anyway and I'll see if I can figure something out. It may affect the price a little bit.

I'm willing to do this pretty cheaply. I'll even accept payment in the form of Bytes for now.

Standard Price

50 Gig \$3.00 or 1.2k Bytes

100 gig \$4.00 or 1.6k Bytes

500 gig \$8.00 or 3.2k Bytes

These prices above are with the assumption that there are only a few large files to download. If you require lots of separate files to be downloaded this will affect the price, we can negotiate a price that we are both comfortable with.

I cannot download 500 * 1 Gig files for only \$8.00. the time alone to gather the links or .torrent files would be too great.

prices are subject to change in the future, as this is more of an experiment at the moment.

DM me if you are interested, and we can come to a deal suitable for your needs.
