Does anyone here know phonextream.com? They're pretty good. I'm using them for multi-accounts and marketing. In case anyone's interested, I've been using them for three months and recommending them to almost everyone I see, because they also have and are implementing an automatic referral program to earn money for those who sign up.

But seriously, it's pretty good, and I invite you to come and try it. It's much more secure than proxy and VPN, for example (if you don't have as much experience as I do with these things).

Use purpose for the proxy?
Across the device or on select programs/apps..
