Thread: [Hiring website developer for small project.](#)

Cryptomix - March 24, 2023, 2:44 pm

Hello,

We have a business website made in WordPress, but it is displaying poorly on phones and tablets. We are looking to hire someone to fix this issue and improve the overall appearance and quality of the website for mobile users. This will involve optimizing text placement, images, and all other aspects of the site for mobile users.

The business is related to construction. We will choose a developer based on price and how fast it can be done. We are eager to get it done as fast as possible so that we can start advertising on google.

Please send us a private message for our contact details. We prefer to communicate through telegram.

We will be making payment in BTC.

[contract=tid]Start Contract[/contract]
