Hi everyone,

I am sharing a money making idea which I found browsing the Internet. I haven't tried it myself but it sounds promising and with a bit of tweaking here and there you might net some income for a few weeks work.

- 1) Create some sort of meme brand doesn't matter what it is as long as it is trendy
- 2) Create a shitcoin on BSC with the same name
- 3) Create a fun looking website and start promoting your telegram and discord groups in various forums
- 4) Here is the hook - Fill your website with affiliate links. Surround your entire marketing campaign on the premise that you will use the affiliate commissions to fill the liquidity pool
- 4a) You can be a scammer and not do what you promised or;
- 4b) You can actually do that; Your choice really it doesn't matter

It is not something which will give you income long term but I think it is good to give it a shot if you have resources.

BSC Casino is closed till marked is safe. Until then, the chances are slim that someone will get into your shitcoin

I am sorry but this is excuses imo. What difference does it make when the shitcoin bull market starts? You can still lay the ground works for this atm. But I guess it is better to complain
