Hey, I was tryna make some money off cpa marketing. Is it possible to start off making money without investing in ads or just using free traffic. Ive tried a few methods and traffic sources but none of them seem to work very well for me

It's possible. I made over 8k from one youtube video when the hoverboards were popular in 2015-2017 with no money spent on ads. I've been trying out youtube reels, tiktok, facebook shorts and they seem to be profitable, and you shouldn't need to spend money if the videos you're posting are decent quality.

Social Media is completely free and manually you may be able to get a couple of leads/conversions by just engaging with people. You can also promote a video with instructions and an incentive and share it as a post. Are you into non-adult or adult cpa network(s)?
