The tool present itself as simple and clean executable that you have to run while in match so is not gonna do anything if the button GO is pressed in lobby or any other LOL client windows. The tool improve the ability to zoom in and zoom out providing a better and bigger range of visual helping a lot to spot enemies and aim ranged spell ( as for personal example ). It simply need to be executed and once the match start you must press the only go button present in the window the executable create and then you will have zoomhack enabled ingame. Tool must be manually updated by coder in case of bigger changes in game but is not detected and i believe will not be due to his nature of the hack. It should support future version of lol updates by the way and does not have any inbuilt remote updater. I recomend the purchase of this tool due to long lasting work and due the perfection of the zoomhack and the kindness of the coder. DO NOT hesitate buying that tool if you want to start win ranked match!

i dont know if i am allowed to post screenshot of the tool and ingame functionality so i will wait the permission in meantime

Kind of annoying that I have to download a video to watch, I'm way too paranoid for that but this sounds pretty cool.

After you open a link, click on 01.04.2023\_04.16.33\_REC.mp4, and it opens a video in your browser.

Give me a day or so as I need to install most games back onto my computer as I formatted not too long ago, then I'll get a smurf on the go and try it.

**MaDTiA** - April 3, 2023, 4:21 am

is the vouch copy available ? i can test and make a video if needed :)

i do play only lol so i can show others the quality of your job :)

Will do tomorrow appreciated

**jcole** - April 3, 2023, 2:12 pm

I play League of Legends almost everyday. I would not mind testing your product on an alternate level 30 of mine and try ranked.
