Thread: [Competent Python/C++ developer who will be my partner throughout the project](#)

Europe - April 2, 2023, 8:05 pm

Take notice

I can currently not give any information regarding the project for reasons not specified anywhere. I crafted the foundational aspects of the code with exceptional accuracy, and it would be a grave mistake to undervalue the importance of this project.

I've seperated the different features into different files that each contain their own purpose. Furthermore, I have enhanced the comprehensibility by incorporating immensely valuable insights into the function of every code block.

Are you the highly skilled Python and C++ developer I am searching for? Your expertise is essential in bringing my code to life, but what's more important is your passion for turning ideas into reality. Let's work together to transform this concept into a fully-functional application that will exceed expectations.

[IMPORTANT]

If I decide to work with you, you will get paid according to the sales of the project and we will create mutual trust.

Do not underestimate the quality of the project.

Quick summary :

- I layed out the fundamentals of what it needs to.
- I made it as efficient as possible to do stuff not anywhere specified.
- I manufactured comments so its much faster to understand what each block does.
- I will be proactively working on this project and be helpful wherever I can.
- You will be my main partner throughout the project, including all aspects that come with it, sales, communication and will provide full transparency.

Lastly : Only message me regarding the project, if you are truly interested, we will exchange discords, and if I choose to work with you you will be provided with more information regarding the project.

Ducky - April 3, 2023, 7:41 pm

Sending you a message.

Still looking for other potential partners. DM me ASAP

darkcode - April 7, 2023, 1:23 pm

I could help you with this if you have not already found someone. Also do you have any sort of upfront budget or is this all trust based partnership.
