~ Bumble Method ? Verification Bypass and More ~

Most men in the world either use [BRAND NAME REMOVED] or Bumble to find girls. They are almost the same applications, and can both drive a lot of traffic to your OnlyFans model, the only difference being that Bumble is WAY less saturated and way less protected than [BRAND NAME REMOVED], which is almost in a dead state atm.

With this method, you'll be able to create unlimited accounts and make them swipe automatically 24/7 to get unlimited OnlyFans subs. Easy 20-30k per month.

THE METHOD IS STILL WORKING AS OF LATE SEPTEMBER 2023 ?

(Jul 6, 2023 09:48 AM)Zimhoni Wrote: [\[CITE\]](#) bought it with zero experience and it's worth it! the guide is VERY smooth and the support has been responsive (at almost any time of the day) and helpful (answered in depth to my issues) which is rare to find on HF nowadays.. GLWS!

~ What's included? ~

??? How to create unlimited accounts ? I will answer all your questions

? How to put your Snap or your Instagram in the bio ?

? How to get verified on Bumble

? How to make your accounts run and match people 24/7

? How to get Bumble Premium for a very low price! (less than 1 USD)

? How to get the most out of your Bumble accounts

? What is the best setup to run Bumble accounts

? The best SMS and Proxy providers (I've tested 10s of each so you don't have to) ?

? And many others tips and secrets I learned from running Bumble accounts on a large scale

?PROOF?

?PRICE OF THE METHOD?

This method is way, WAY more spamable than [BRAND NAME REMOVED] as Bumble security systems are much weaker, hence why the price is a bit higher than [BRAND NAME REMOVED].

MeTheOG - May 2, 2023, 4:26 pm

I am not personally vouching for this method yet, but it looks legit. Thanks for sharing.

on1x1 - May 3, 2023, 3:57 am

Do you verify acc with model or poses?

Zimhoni - July 6, 2023, 9:48 am

bought it with zero experience and it's worth it! the guide is VERY smooth and the support has been responsive (at almost any time of the day) and helpful (answered in depth to my issues) which is rare to find on HF nowadays.. GLWS!

Don't you just verify with obs, even if you need to use a cam name changer and use nice proxies. What does the method include thats not public any software etc

No OBS, some softwares can be used but everything is detailed in the method

raregod - July 11, 2023, 3:34 am

Does it use appcloner

facelessamigo - July 13, 2023, 5:06 am

Method is not working for me. Replies on your questions in some cases taking 1+ day.

After I asked to make at least 1 account with me - stopped replying.

Waiting for your message in discord mate, hope we can solve that situation in positive way

So, as a reply I got the message that sales trashing and public claims that the method won't work automatically discards any future updates or help from seller.

Strongly not recommending this seller's method

ULTRA™ - July 18, 2023, 9:08 am

? buyer above got super fast replies (few minutes most of the time), I only took time to reply twice because of some personal issues (I'm a human too) and he decided to trash my thread.

I told him that by the TOS, publicly trashing the method discards the future support but that I was still willing to help him, I asked what his issues was and he didn't reply for 4 days.

The method is vouched, it is working, and will continue to work as long as you can see this thread on HackForums.

Quick PSA: do not buy this method if you are not willing to follow the TOS and if you need immediate answers 100% of the time, ChatGPT exists for that purpose.

However, if you're okay with the TOS, I'll gladly sell you the method and answer all of your questions

Like I said, I also have a life and you can't expect me or anyone to always be there to instantly answer every single question. I told you that publicly trashing my method would discard the future updates and support, you said "no problem", then you proceeded to trash it even more before coming back to me for support. You gotta choose mate.

Oh and for those wondering, I kept helping him even though he kept trashing my method :)
