Started a contract to claim a vouch copy if there're still any left.

I can confirm I have received my vouch copy RDP.

Screenshot of the specs:

I will try to update this post on another date with how its been so far.

Update 1: It seemed like there was some issues from the sellers side, as the RDP went down, Issue was resolved within 48h and i got sent a replacement RDP with the same specs as shown above.

still up and online, discord and whatsapp service number are also now active.

RDP are natted by default. Exclusive ipv4 need to be ordered if you need unique not natted ip
