Thread: [WAF bypass](#)

fsdfawe453425 - April 5, 2023, 3:57 am

how do I bypass the web application firewall of a server which has a huge number of subdomains and SQL ports open? My goal is to take access to the database. it's all subdomains have about more than 500 ports open

visit to know more:

go to the pastebin dot com with the ID 3rpe7RYg
