Thread: [CUSTOM DISCORD TOOLS FOR SALE | NITRO REDEEMER & AUTO SERVER BOOST BOT](#)

spiral - April 8, 2023, 12:50 am

Selling lifetime keys to both of my custom made bots that can be used if you wanted to start selling Discord Nitro Tokens/Server Boosts. The Nitro Redeemer is used to redeem nitro codes automatically and on a large scale onto regular discord tokens, takes around 15-30 seconds per account to redeem the nitro on and is multi-threaded so can redeem bulk amounts per day, I am including two versions of the bots one which is fully request based which is the fastest and the least bandwidth consuming on proxies, then another which is done via browser automation which allows you to use vccs which require a 3DS prompt to approve the \$1 hold that Discord takes to check the cards have a balance to be able to redeem. Both of these versions are included in the price to allow flexibility on how you redeem.

The boost bot is also a custom private version which can boost a server to level 3 in under 30 seconds either by manual command specifying which server or automatically via autobuys (sellix, sell.app, sellpass) apis, in this case the buyer would place an order on your autobuy page inputting their server, once the transaction is confirmed the bot will automatically apply the boosts. My bot will get no captcha on join (as long as the tokens are not bad quality and force it), won't cause any tokens to become invalid which would result in some of the boosts being possibly revoked.

Prices:

Redeemer Lifetime Key - \$50

Boost Bot Lifetime Key - \$50

Package Bundle of both - \$75

I can also provide my own RDP + Proxies to use for either of these tools for an extra \$15 per month, if you wanted me to setup the bots for you or required general help with the entire business for an extra \$100 will include full mentorship support by myself.

I am selling these bots simply to make some extra cash, had these developed quite a while ago and have worked perfectly since, and if any patches did happen a solution would be found and provided for free (if possible) as I will be continuing to require these bots for the foreseeable future.

Any questions feel free to ask.

Hello,

Is this offer still valid?

If so, I have a small question about the bot redeemer. Do I have to give it codes found elsewhere or is it 100% autonome to apply the nitro?

Thanks in advance and have a nice day!
