Reposting my review from the previous thread:

I got a copy of the UE method from OP (not the Uber rides, can't comment on that).

Overall thoughts:

Seller was responsive and patient. We used an MM on this forum and the transaction was smooth.

The method itself works. I have experience with methods before so I knew exactly what I needed to update in order to order again, and this method had that.

For transparency purposes, there will be an additional purchase required to get the method to work,

and some hoops to jump through, but it can be worth it if you order regularly.

As for the claims of this method lasting forever or that only 5 people in the world have it, I'd have to say that just isn't true, as anyone with experience doing UE methods will know that these things will only last for a number of months at most before it gets shut down.

Disclosure: I only tested the UE promo code method as I don't like doing refunds. I'm sure this is the main selling point since failed payment methods are the biggest hurdle in these situations.

These are just my own thoughts. Feel free to purchase and use at your own discretion.

Conclusion: I do recommend it since it works.
