Thread: [I am looking for someone to teach me the basics of hacking.](#)

Flightium - April 11, 2023, 2:50 pm

Hello i am 13 years old and i want to get into hacking i have been looking all over this site for hacking tutorials and nothing seems to work.

So im asking for someone to teach me hacking. please pm me if you can help.

Update: I looked into the types of hacking and
I want to be a pen tester.

ALEDIO - April 11, 2023, 3:16 pm

Welcome to the forum, I start by saying that I don't know if it's allowed to use this forum at such a young and small age, but I still want to give you some indications. Read carefully the guide and the rules of the forum that you can find by clicking on the "menu" section of the forum. I start by saying that the world of hacking is very complex and broad, in fact it extends into very different types of hacking so there will never be a general guide to learning how to "hack", it takes many other basic knowledge to advance in this world that are crucial to being able to understand even a simple explanation from any member of this forum. If you are so determined that you want to start learning something I advise you to search for resources on the forum yourself and put them to good use, here you will find many tutorials and guides on many different topics. For any other question, feel free to ask, otherwise have fun on the forum!

Royal ! - April 11, 2023, 6:25 pm

Depends what aspect of hacking you are looking to learn?. Its a very, VERY broad term.

\$crim - April 11, 2023, 6:53 pm

Go at your own pace, Don't try to be like other known exploiters, Hackers, Do your own thing.
goodluck!

A few things:

I don't teach minors. Wait a few years.

I never recommend that anyone go straight to hacking. There's nothing basic or beginner about it. Start with A+, Network+, and programming if you can handle it. You need to know how computers

are supposed to work before trying to hack them. Not knowing what you're doing is why nothing seems to work.

deals.escapistmagazine.com and CodeRed.eccouncil.org have good IT courses to help you get started.

can you please help me i want to be a pen tester when i grow up and i know hacking is not like in the movies.

I know i am young but i can pay you 20\$ i am begging you i cant find any hacking tutorials on here or anywhere.

PurpleMoss - April 12, 2023, 2:28 pm

(Apr 12, 2023 02:11 PM)Flightium Wrote: [\[CITE\]](#) i cant find any hacking tutorials on here or anywhere.

I'm sorry but there are hundreds of guides and tutorials online, so many free ones too.

Flightium - April 12, 2023, 2:39 pm

Can you link me something for pentesting?

(Apr 12, 2023 02:28 PM)PurpleMoss Wrote: [\[CITE\]](#) I'm sorry but there are hundreds of guides and tutorials online, so many free ones too.

i want to be a pen tester

Dread.Reaper - April 12, 2023, 5:44 pm

[Pentesting and Forensics](#)

If you had a hard time finding this you got a long way to becoming a pen tester.

PurpleMoss - April 13, 2023, 12:39 am

i want to be a pen tester

If you can't find guides on the internet then being a pen tester isn't for you. Pen testing is all about looking for things so you better start learning how to look for things. There really isn't any excuse to not be able to find anything, you have Google, YouTube, many instructors out there, even ChatGPT.

You can find something at those links within your budget. You'll also find a lot by interacting here and asking questions when you know enough. You're still young, and no tech skills require patience more than hacking. Learn everything you can about computer systems networking, and programming. Experiment with the new Kali Linux Purple. Ask for a Rubber Ducky for your birthday and say that it will give you good experience.

Edit: The Flipper Zero is another hacking tool making waves

LOL

Rubber Ducky your the one....

But yea, Rubber ducky's are a cool tool, but Pen testing does not have to be super expensive. The fact that OP could not find the Pen Testing section is kind of concerning however.

Sand Ferret - April 13, 2023, 9:36 am

TryHackMe is a good place to start if you want to go down the route of Pentesting.

Hacking is a very complex thing to do, their is so much topics you have to learn. But besides that you can always watch NetworkChuck on Youtube, he is a good teacher

DramaKing - April 13, 2023, 3:35 pm

OP was posting about e-whoring and other ways of making dirty money almost six months ago. I

wouldn't consider him on the level.

Let me know how you get on. Start at the beginning and start with easy stuff. Don't dive in the deep end just yet.

Thank you so much this helped alot reading this in
School rn

DramaKing - April 14, 2023, 5:08 am

Forgot to mention that you should try your public library. My local library has a copy of "Hacking for Dummies," and there are several other hacking books in-network.

i am really bad at reading and i have a condition where paper really gets on my nerves but thank you for helping

and im really starting to love the hacking community everyone is so helpful and nice

That's fine, I mean I have no condition but I'm not a fan of reading. Online resources are more than enough.

krootca - April 14, 2023, 1:22 pm

Hello bro, I can Teach you you can "walk" in hacking, please say me hello in Telegram, I am the user [deleted]

How to learn basic hacking:

- 1-GNU/Linux, you need to know the GNU/Linux history, you need to know how found the system of Unix
- 2-Terminal of Unix, you need to know bash, bash is a very import in skills of hacking
- 3-You need to know Kali Linux Os or Parrot Os. Install that os and practice with it, practice how found the programs of hacking in that's OS.
- 4-Practice with virtual enviroments, (Labs), you can practice in Hackthebox, TryHackMe or portswigger, or other page but that pages are tops in hacking.
- 5-Learn Python, c++, go, powershell, etc... You need learn much.

Happy Hack~ [warn]

?I will not ask you for money. You should not only be wary of people who ask for money, but also those who want to teach you something and make you run commands, as they may install a backdoor on your system.

- Scam
- Infect
- DOX

List goes on.

Further. NO OFF SITE COMMUNICATION

_vxt - April 15, 2023, 2:51 pm

I can help you become a pentester; pm me

slezer - April 15, 2023, 7:20 pm

The way I started was by learning basic scripting languages like Batchfile, PowerShell, and web languages like PHP, MySQL, HTML & CSS. You have the best age to start learning hacking/programming. Since you said you want to be a pentester, you should make an account on TryHackMe, look around and try following their guides to pwn a couple of their boxes. This is also a great way of learning how to use Linux; Linux comes in very useful in this field and you will need to learn it to become a pentester one way or another.

HTML, CSS and Batchfile is the easiest languages you can learn to familiarize yourself with code editors and coding / scripting.

If you have any questions, feel free to shoot me a PM.

Peace.

Forex Advice - April 16, 2023, 3:47 am

best learning is from trying :)
