Thread: [Bypassing 403 forbidden](#)

73SLA - April 14, 2023, 2:21 am

cheerz gents!

Im looking 4 a cool exploit to bypassing 403 forb error.

So

when I accces

<https://artaseductiei.ro/forum/>

as

a

result IT said to me

=====

403

Forbidden

Access to this resource on the server is denied!

=====

exploit to bypass

<https://github.com/daffainfo/bypass-403>

what the heck is 403 forb?

The HTTP 403 Forbidden response status code indicates that the server understands the request but refuses to authorize it.

This status is similar to 401, but for the 403 Forbidden status code, re-authenticating makes no difference. The access is tied to the application logic, such as insufficient rights to a resource.

WOW!

There isn't going to be a magic one program to bypass this, otherwise everyone would be doing it. The forum is obviously restricted to certain users accessing it. This could be done via a session or IP based. You need to figure out which one before even trying anything. Most likely it is session based. If that's the case, you need to get the session or creds of someone who has permission to view the forum.

Try byp4xx is better than bypass-403

UDPz0r - April 21, 2023, 3:46 am

As far i managed to see the forum.
