I'm not sure what does `Verified to Hashtag` or `Verified to Post` mean. Can you help me understand what is this service about in more detail? Also, would you need credentials if someone opts for this? Curious!

Verified to Post will attract 1,000 verified people to a post of choice in the comment section.

Verified to Hashtag will direct 1,000 verified people from there pages to hashtag search query.

These services are intended for businesses & creators. No credentials are required.

Fast & engaged traffic. ?
