Thread: [Looking for promising AI projects.](#)

SIM-1866423 - April 15, 2023, 12:54 am

Do anyone have some good AI projects ? In next 5 years world will invest at least x100 more into AI projects so .. we need to invest into since it is too early.

ep1capple - April 15, 2023, 2:53 am

the best AI investment won't be in crypto it'll be in stocks. Microsoft is your best bet since they recently acquired OpenAI (chatgpt tech) I believe. AI crypto coins are a bit of a scam currently and are purely speculative driven.

u?op ?pisdn - April 15, 2023, 3:43 am

Fetch.ai has been a great solid project for years, would recommend to look into it.

Yin Yang - April 15, 2023, 7:13 am

(Apr 15, 2023 03:43 AM)u?op ?pisdn Wrote: [\[CITE\]](#) Fetch.ai has been a great solid project for years, would recommend to look into it. Fetch is probably the top one for sure. There's ChainGPT as well but I don't know if it's legit and just a P&D

SUI-3183372 - April 15, 2023, 10:26 am

ai + crypto = scam

I'm all in on AI elsewhere, but AI in crypto is 999/1000 going to be rug pulls. Generate hype, cash in on hip buzz words, produce nothing of actual value.

Omniscient - April 15, 2023, 11:37 am

There is a Robotics and AI ETF you can invest into...

<https://finance.yahoo.com/quote/BOTZ?p=BOTZ>

<https://www.globalxetfs.com/funds/botz/> (fund page)

Does it matter ? I don't mind following hype

Yeah literally this.

Anyone with an elementary level of understanding of crypto and AI know that AI on the blockchain is generally a very retarded idea given the cost of compute/broadcast, training/deployment and other computational aspects. This means that most of the AI projects you see in crypto will drive hype with technical jargon that realistically makes little sense.

Also would highlight that AI on the blockchain and AI with blockchain data are two very different things (former is vapourware, latter can be legitimate).

Cooldudex - April 15, 2023, 9:15 pm

(Apr 15, 2023 05:06 PM)SIM-1866423 Wrote: [\[CITE\]](#) Does it matter ? I don't mind following hype
No, it doesn't matter. Most crypto is all hype and absolutely nothing else so there's absolutely no difference following "promising" AI projects for hype alone regardless of if everyone with brain cells knows they are going to fail and be useless.

That being said.. all the fun AI projects that mooned already had to do with pointless gimmick shit like AI art which is already losing hype. If you are going to follow something I would say fetch.ai at the moment.

Keep in mind that all crypto AI stuff ON the blockchain(you should know the differences) is generally dog shit and I would never invest in any of them for 2 months let alone 5 years

YungPancake - April 16, 2023, 8:13 am

Ai and crypto combined prob scam but I'm down to follow a pump and dump if I'm early lil

popZmoke - April 16, 2023, 8:49 am

SIM-1866423 - April 27, 2023, 7:19 am

Okay so .. I randomly search some projects related AI and saw 2 projects on kucoin and of course bought both of them without research ?

<https://www.kucoin.com/trade/CGPT-USDT>

<https://www.kucoin.com/trade/GPT-USDT>

GPT down a lot so i did sell for loss(-1400\$) and bought more CGPT to try my luck here is results;

I tend to agree. These early phases it will be about scams. My guess is that eventually some AI+Crypto integration will happen but for now I can't even think of a use case.

INFECTED]google.com/file/d/1VnsobL6IIAAqcA1_Tbm8AYIQscfJV4KU/view

While I don't think this one is a total scam, I bel I still don't really see why it needs to exist.

Edit:

Whatever Pinecone is, they're giving a talk right now at Consensus

Learn how to use the OP stack (OpenAI + Pinecone) to create overpowered AI features for your products. Our featured speakers will share lessons about combining OpenAI (ChatGPT and GPT-4) with the Pinecone vector database for deploying real-world, large-scale applications such as semantic search, chatbots, and threat detection more.

ChainGPT (Layer-1 Blockchain) Virtual Machine

I dont think it looks like scam or like that if we consider GPT is not updated and not giving any financial advice it makes pretty much sense to me.Of course dont be like me and spread money into projects without checking it but i am pretty sure soon there will be some solid projects that makes a lot of sense.

edit : i sold at for 0.17 for like 5k profit and almost made x2 AGAIN lol.

?{ RadioActive Hack }? - April 29, 2023, 7:05 pm

I'm very sceptical about any AI crypto projects. It seems as though most are just cashing in on the AI branding and have little utility in AI technology.

I don't really see any benefit for using blockchain for AI development.

I do need to do deeper research on the projects flaunting "AI" branding, but my current position is that I think the best way to get exposure to AI technology in Crypto is through the Render Token, as GPU utilisation is fundamental to AI development.

I have no doubt that plenty of AI coins will see massive growth in the bull season. Although I think this will be based on sentiment and only the missing leading appearance of real technology. At their core they are just shit coins.

yeap idk why sold at 0.17(%70 profits) tho lmao if its down i will buy little bit will spread randomly 1k each into ai projects again, major coins are basically dead there is no movement so .. it makes sense right now.

Yin Yang - April 30, 2023, 3:29 am

Which are you putting on if you don't mind me asking? Like VRA, GRT and RNDR? Or the much lower caps/trading volume

ones?

Abzorb - April 30, 2023, 3:49 am

Not sure if Ai crypto projects will last long enough! Most of them are pump and dump!

SIM-1866423 - May 1, 2023, 12:50 am

buying xrd for cover up loses(if there will be any) already bought a lot at 0.1c so i wont lose any money from these AI projects at worst i will cover up from radix.

Don't quote everyone to post your spam.

If you even read my post you would realise I'm not going to be interested in your trash.

buying xrd for cover up loses(if there will be any) already bought a lot at 0.1c so i wont lose any money from these AI projects at worst i will cover up from radix.Which exchanges are those lower ones on? Can't find on KuCoin.

I'm just tossing some on VRA, I'm sure it'll do well and rise again.

Xrd can easily go back to .03-.05 range again. The KuCoin competition is over and I've always seen it dump shortly after. I'm holding off on buying anymore personally.
