Thread: [7y-10y bitcoin holders are selling](#)

kriptoles - April 20, 2023, 5:00 am

Spent Output 7y-10y is a band in the indicator called Spent Output Age Bands, which measures Bitcoin's age and market activity. This band represents the use of Bitcoins aged between 7 and 10 years. Looking at historical data, increases in the Spent Output 7y-10y section have occasionally led to decreases in Bitcoin price.

shreder - April 20, 2023, 5:14 am

They are selling their BTC for Ethereum thats why.

Chida - April 20, 2023, 12:23 pm

Yeah, just now 9.3 year sleeping 6071 BTC wallet just did a transaction:)
