Thread: [Userscript: Add Deal Disputes to HF Trustscan](#)

Yani - April 21, 2023, 11:20 am

This userscript will add a list of threads found in the Marketplace Discussions and Deal Dispute subforums regarding the user who's trustscan page you are checking.

After installing you can find the threads at the bottom:

Here's the direct link to the script:

<https://github.com/yani/hf-trustscan-uid-search.user.js/raw/master/hf-trustscan-uid-search.user.js>

For installing userscripts I recommend: [ViolentMonkey](#).

(A community driven variant of GreaseMonkey and TamperMonkey)

It uses the search function but also scrapes the first few pages of the subforums to make sure it finds threads that are not in the search cache yet.

If you don't trust me, or don't want to trust me, you can disable automatic updates by removing the line starting with:

Code // @updateURL

Stay safe :)

Ooooh this is cool.

Good job!

Good job!

I actually made it in 2016 but the thread got removed.

I came across it earlier today and noticed it was broken so I updated it.

Great Idea. Nice job on script. Thanks for reuploading OP.

Nostre - April 21, 2023, 2:18 pm

Nice userscript.

I'm going to move this thread over to Marketplace Discussions to make it easier for others to find.
