I've been hearing about how people have been waiting until their 20,000th spin. I could barely even stand 9k let alone.

Drove me nuts lol

Think I'm going to go for the Medal of Honor next, it'll be awhile since I'm only at 18% & only hit for NASA.

That would be a tough goal, just keep the grind going daily and eventually you will get there. Good luck bro ???

Congratulations on the award you got!

This is one of the awards that I would like to get but I think that the resources available to me are very few to get it, also because I should have a lot of bytes, which at the moment I don't have.

I only had 150 roughly in my balance when I gave it a shot yesterday. You could definitely try your luck, might be worth the shot!

I congratulate you on winning this award, it's just a terrible shame that it takes a lot of turnover to get it. Maybe in a few years I will become its owner myself?
