Thread: [Issue is coming in MyBB](#)

Transporter007 - April 23, 2023, 7:50 am

Hey guys,

From 20th April 2023, auto login on website with different username and when I logout it show this below error:

Your user ID could not be verified to proceed with the log out process. This could be due to malicious Javascript that was attempting to log you out automatically. If you intended to log out, please click the Log Out button at the top menu.

Moreover, Backend admin panel working fine and showing correct members while on frontend it showing different members. I don't know what's happening to website from today!

I have checked the cookie settings and all good as well.

I have cleared the browser history, cache, cookies as well but same issue.

I have also deleted the members which are registered from 20th April 2023 till Today 23rd April 2023.

If anyone can fix it I will be glad!

Regards.

Omniscient - April 24, 2023, 9:47 am

That seems like a browser error.

"Your user ID could not be verified to proceed with the log out process."

I don't believe that's MyBB core code.

Fixed. Actually it was ezoic code issue. 3rd party always give error and issues.

BTW can you tell me how to fix those:

All warnings are on plugin section.

Warning [2] Illegal string offset 'database' - Line: 110 - File: inc/plugins/google_seo/plugin.php PHP 7.4.27 (Linux)

Warning [2] Illegal string offset 'encoding' - Line: 110 - File: inc/plugins/google_seo/plugin.php PHP 7.4.27 (Linux)

Warning [2] Illegal string offset 'database' - Line: 113 - File: inc/plugins/google_seo/plugin.php PHP 7.4.27 (Linux)

Warning [2] Illegal string offset 'encoding' - Line: 113 - File: inc/plugins/google_seo/plugin.php PHP 7.4.27 (Linux)

Warning [2] Illegal string offset 'admin_dir' - Line: 153 - File: inc/plugins/google_seo/plugin.php PHP 7.4.27 (Linux)

Seems like you might be using an incompatible plugin version, or you uploaded the files incorrectly.
