Hello, i don't give the internet my phone number and was having trouble signing up for chatGPT. Does anyone have a phone they can help me verify with or an extra account? Thanks

You can try <https://mobilesms.io> , 5sim or any of the other popular ones.

Personally, you can often get by using TextNow on your PC. Although, for more indepth services like Paypal, they will detect the use of a virtual phone number.
