Intro: For the last 6 months I have been working so hard trying to find something to fill some extra financial needs I have being a young father. As I've worked an IRL job I've been saving my money and decided I wanted to really risk it and invest some money to work for me but I didn't know where to do it. I've purchased some methods on here but I am not in the game for anything somewhat illegal. I need money that I can report tax wise and not have to worry about what might happen the following year, and so I found this. I've spent about 2 weeks writing this as I don't always have free time from my IRL responsibilities but I figured I would finish this up and get it posted. There will be some updates (purchases come with lifetime updates) and there may be an addition to this service where I create products based on research for the buyers. But for now, this guide is 12 pages long and ready to go.

Let's cut right to the chase. What is this eBook and why do I need it?

This isn't just an eBook with a method. This is a full, in depth guide to build yourself an amazing, income generating shopify platform within a few hours of work. This is not your average method or guide, there are videos, links and even a graphic design solution inside that could open the door for you to outsource graphic work yourself and profit on the side as well.

You will need an investment to start off. This purchase is not for somebody spending their last bit of money to try to win big. This is an eBook for someone with some money ready to go, that want's to put it to work for them.

The required amount for investment to start up is approx. \$75- the rest of any money going in will strictly be down the road and for marketing.

=====

There's not much more for me to say in this. If you're a creative individual, ready to start making some money in your sleep this is the right product for you. If you're REAL creative, you'll see that there are multiple other methods within this guide that you could use to monetize and make some more money. Are you willing to invest in yourself?

The vouch copies I'm looking to give out will go towards a member with a decent business standing within HF brotha, I'd be willing to sell you the first copy at a discounted rate (I just made the same offer to someone via messaging) but not a significant price.

Very interested by this products, waiting for more vouches to purchase.

Is an investment necessary to start making sales ?

Hi there!

An initial investment is required and realistically if you possess graphic skills you're looking at a minimal investment.

But if you want this to be an easy process the investment really isn't high at all. Under \$50 gets you started at least I just recommend a little more money to play with to scale your margins and conversions

How long does it take to set everything up?

How long does it usually take to start seeing profits coming in?
