Thread: [SQL Syntax Error - error based inection possible?](#)

White Hat - May 1, 2023, 12:36 pm

Need someone who's experienced in SQL Injection to see if a site is vulnerable.

When you make a post on the site and delete the post right after I get a
"General Error [mysql] You have an error in your SQL Syntax; check manual that corresponds to your MySQL server version....."

Willing to compensate.

pankb - May 1, 2023, 1:50 pm

yes it may be vulnerable to error based sqli

source - May 1, 2023, 8:25 pm

what is the actual SQL query that is generating the error. If the query includes user input that has not been properly sanitized, it could be vulnerable to SQL injection

Money- - May 2, 2023, 4:58 am

PM me the site , I wana have a look and play around a little.

Stunner - May 2, 2023, 3:56 pm

Pm me this i'm willing to take a look

Error22 - May 17, 2023, 8:50 am

drop url lets i check for you

it may be vulnerable in the sqli.

if so, you can use sqlmap with option --technique=E.

good bye.
