How I did that at first i was talking with her from 25 April she really wanted to start

I prepared my team to start with her and we did exactly this

We told her to shoot some tiktoks so we have some content ready

We started growing her ig's and other platforms that are really performing good

At April 30 we started downloading all the content needing setting all the vaults etc

Since all accounts were fine to bring traffic we started uploading her tiktoks on the other platforms to get subs and advertising her OF

Till this day we managed to get 150 subs and she at almost 3k right now she'll easily 20-30k this month

Was also wondering this. I've previously been curious as to what kind of cut/money someone in a

position like that usually makes.

I can't believe how much people spend on tips and messages

It's great for you and people like you

but sad, very sad

Capitalize on it

But hey, some people need that type of "attention" so if they aren't hurting anyone, more power to them

Yeah! To each, their own is how I see it. I just tend to see the negative in most things these days, need to shift my subconscious back into reframing things in a more positive light.

It's hard to not see the negative, but as long as it isn't hurting people, emotionally or physically, I say it's okay.

Some men will get attached, but really they should be smarter. And I suppose any industry has their unrealistic problem customers. This is just what I've heard I've never been involved in this.
