Thread: [PC on Stat Trak Huntsman - Gamma Doppler P1 - 0.002 Float](#)

Motiv - May 1, 2023, 8:33 pm

Looking to get a price check on my gamma doppler. The float is 0.002 and I cannot find one on the market, Stat trak or not.

Deciding if I want to cash out and snag an ursus doppler or marble fade, or maybe upgrade to a huntsman gamma doppler p2.

Any advice is appreciated.

There are some people who can PC on here possibly but I would just stick to posting it on the trade subreddit as there are people who will be able to give you an actual accurate price almost instantly

Haven't checked the db to see where it lands because there's no link but as you can tell by buff these are not that easy to price everyone is kinda weird, especially with cs2. I'm sure someone will correct me but you might end up getting like 90% buff unless this is less rare than I think it is, and probably 80%ish if I'm wrong. (for similar floats)

Damn okay, not bad at all. I snagged it for like \$640 on the Steam market. I saw how few scratches there were and made a nice profit.

Should I keep or go for an ursus dop p1, ursus marble fade, or upgrade to a regular huntsman gamma p2?

Velma - May 2, 2023, 8:27 am

You have the 3rd lowest float stattrak huntsman phase 1, I would recommend going to a extremely reputable person in the csgo scene to get a proper valuation of this item.

Very very cool pick up.

Current buff pricing on the 2 low floats like yours is \$800 minimum.

Great to hear, happy you said something before I sold it on the market. It looks amazing in CS2. Thinking I should hold on to it and see what happens to the price?

Up to you, markets have been on a crazy run they will stop eventually and correct itself. Up to you at the end of the day I cant predict the future. if you plan on buying skins, sell the knife on buff and use funds to buy skins on buff.

I don't need a better float and tbh the p1 looks just as good as every other gamma phase in cs2 (I like the blue,) so ima ride with it. Thanks for your help!
