Q: What type of AI is integrated?

A: We use Open AI's API system to integrate the AI model that is specifically tailored for your business needs.

Q: I already have a website, will you be able to implement AI to my existing site?

A: Of course! We can integrate an AI system to your existing website or custom code a website completely from scratch all based on your requirements.

Q: What kind of businesses do you work with?

A: We work with anyone that wants an AI solution in their business. Whether you want it for a personal project or business, we work with businesses of all sizes and industries, from startups to large enterprises, to provide custom AI-based software/website solutions tailored to your specific needs.

Q: How long does it take to develop an AI-based software/website solution?

A: The timeline for development depends on the complexity of the project and the specific requirements. We work closely with our clients to provide a detailed project plan and timeline for approval before beginning development.

Q: How much does it cost to develop an AI-based software/website solution?

A: The cost of development depends on the complexity of the project and the specific requirements. We provide a detailed cost estimate for approval before beginning development.

Q: What kind of ongoing support do you provide?

A: We provide ongoing support to ensure that our AI-based software/website solutions continue to deliver results. This includes regular maintenance, updates, and troubleshooting as needed.

Q: Do you also work on the design?

A: If you don't have a design already, we will create a custom design for you and proceed with the implementation after your approval.

Q: Will I be able to maintain my AI?

A: AI has very low maintenance requirements. Once the AI system is created, it will continuously function as required. You will have access to all the files which will be in your website directory so you can edit it and maintain it as you wish.
