Thread: [\[0day\] \[Webapp\] Canadian Email to Phone Lookups](#)

FreedomMobileHacker - May 3, 2023, 3:26 am

hi!

I have a LIVE 0DAY that I have programmed a script for to automate it completely

The result of this was that I made a .onion hosting a web application to do automatic email to phone lookups

To use this website PM me and ask for my tox, telegram, jabber or etc and send me 1\$ per lookup credit for website

for example:

if u buy 100 credits for 100\$

and u look up 150 emails, and only 20 emails have phone numbers that come back

ur cost is only 20\$, have 80 credits remaining

i am also selling the 0day (in a very very big canadian private company) for 4000-5000\$~ open to offers..

If anyone wants to make a big email:phone db with it contact to me to work on it maybe idkk
[contract=tid]Start Contract[/contract]

Bumping, really need to make some money fast

FreedomMobileHacker - May 4, 2023, 12:50 pm

Would love to sell this 0day! Contact me

FreedomMobileHacker - May 12, 2023, 5:22 pm

BUMP!!!!!!!!!!!!!!!!!!!!!! Really need to make some money

journalist7839 - May 23, 2023, 1:20 am

do you have 0day on freedommobile.ca that when given email, if user has account, it gives their phone number

journalist7839 - May 25, 2023, 12:14 am

if it is in the reset password form i found it too xD you can get full phone number as recovery method to send reset code for email. you should (i'm lazy) compile all emails @ domain in leaked databases, then run it through and gather a huge combo list of of email:phone. could sell probably or at least add to breached/leaked lists like haveibeenpwnd
