Thread: [Can no longer see Profiles in Chrome.](#)

The Pact - May 4, 2023, 8:48 pm

Just as of today I'm having problems seeing people's profiles in Chrome and I had to switch to Microsoft Edge and I was able to see Hack Forum member's profiles in Edge.

Eww gross, how is edge above firefox when it comes to trying in another browser

Cooligan - May 4, 2023, 9:04 pm

Have you tried using Brave to view profiles? Brave uses Chromium as well so I'm curious if it's a Chrome issue on your end, or a wider issue.

I'm using Brave (Chromium like Chrome) viewing HF profiles with no issues.

I was a loyal Firefox user until the update that killed all my fav add ons forever and it started running incredibly slow. Also always hated Edge and Bing but now LOVE the Bing Ai feature and believe it or not Bing search in general has drastically improved while Google search is less good than it was prior to 2020

Edge uses Chromium too

Jinu - May 4, 2023, 10:35 pm

I am using Chrome I don't have any issues viewing a profile of a member. Try with incognito mode. If it works, the problem may be with any of your extensions. Also, try to clear the cache.

Well if this is your problem obviously try switching browsers, I don't think it's a problem with chromium, clear your browser cache respectively to the HF site and it should fix itself and go back to how it was before, if this doesn't happen try updating Chrome.

Hm, then it's most likely just on OP's end.

Are you currently running any Tampermonkey scripts for HF or any other extensions that might interfere with it?

I remember a while back I had a contrast extension for some reason and it kept changing the dark mode on sites to this weird light mode and it took me 3 months to figure out why. ? Maybe it's something as simple as that?

Omniscient - May 5, 2023, 9:02 am

Can you describe the problem with more detail? Maybe a screenshot of what you see?

99% it's on your end.

The Pact - May 5, 2023, 7:30 pm

I've cleaned my cache now but the problem persists and I've had Chrome being weird with some other websites too now. Like what happens when I click on the person's profile I see it for one second and then it changes to my only being able to see that option to change the HF bkground to one of those three colors.

It sounds like you have an adblocker enabled that's potentially blocking profiles?

Do you use an adblocker at all in Chrome?

Reason I ask is because you can manually whitelist HF so that way it's not effected by your adblocker anymore.

Also if you're using a proxy or VPN to connect, that could be causing it as well.

The Pact - May 6, 2023, 1:26 am

My default browser had switched to Edge and when I switched my browser back to Chrome default it's now fixed.

Brace mobile is fine

Sparkling - May 6, 2023, 5:40 pm

Not having this issue

<https://gizmodo.com/microsoft-windows-google-chrome-feature-broken-edge-1850392901>

Not sure if this had anything to do with it
