Yes well when it happens I can also use hentai instead of porn to jerk off hehe, after all I think it's normal, now hentai even if I'm not a big fan they are a good alternative to normal porn that maybe can't satisfy certain needs, in any case case I prefer to use the mind in these cases.

Who is Hentai? Is she a Japanese lifestyle influencer?

Google is my friend, and I like a bit of gentle Japanese lifestyle influencing. They're such a sophisticated, cultured, calming people. Back in a second, no doubt filled with all kinds of useful

lifestyle tips.

Open up google images and.....oh good god in heaven. Scrub my eyeballs with bleach. No, forget that, they might heal - aim a flamethrower at my face.

So to answer your question - no, I do not watch hentai.
