About

Pure Miner is an advanced miner coded in .NET will work silently and will be mining whatever coin which can be selected and changed at anytime.

The miner will automatically decide what to mine based on bot specs.
If bot have GPU then it will use GPU mining, otherwise it will use CPU.

You can select what to mine within 1 click, coins BTC RVN KAS NEXA ERGO ETC ETHW XMR are supported.

And you can change the pool or the wallet or the coin at any time without create a new stub!

Mining will work silent and hidden with option to make the file inject itself to legit random process for more stealth mining.

Also the miner have built-in installation And persistence to stay as long as possible into the PC.

What I need to start?

[Buy Windows VPS](#) (recommend Windows 2019)

[Buy Pure Miner](#)

How to setup?

Go to "Plugins" and click "Automatic upload" to automatically upload necessary files for mining.

Click on enable.

Now go to "Build" and check & enable "Installation And Persistence" + "Injection" + "WD Exclusion"

Click build button. After few second you will receive your stub!

How to start mining?

Now lets make a mining task! Go to "Tasks"

Select whatever coin you want, the miner will automatically suggest the best mining settings for you! so all you have to do is paste your wallet address! and press "Send task to bots"

Repeat the same thing to "Mining GPU 4GB" + "Mining CPU"

All done! Happy auto pilot mining!

I'm Stanley HF's helper bot. The OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
Stanley
