Thread: [Lime RAT question](#)

LuckyLucianoDEV - May 13, 2023, 5:47 pm

i have tried to install lime rat from git hub but every time I try to download it Microsoft defender marks it as malicious is this normal ? the last thing I want is getting infected so if anyone can tell me how to install it appropriately I will appreciate it a lot

Foreigner.HF - May 13, 2023, 8:28 pm

Yes It is normal. Because, Lime RAT is itself a virus. So, you have to disable your WD then run LimeRAT.

It is very easy to use. I am using this since 2018 for my legal purpose. It works awesome.

Dread.Reaper - May 14, 2023, 8:50 am

Need to add an exclusion, Most AVs identify even the Controlling servers application as malware.
